

SUMAMA JUNAID

COMPUTER SCIENCE | CYBER SECURITY & NETWORK PROFESSIONAL

Karachi, Pakistan | 0307-1535958 | sumamajunaid000@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Results-driven Cyber Security and Network professional with hands-on experience across enterprise networking, threat analysis, and application security, built through an active IT internship and independent project development. Proficient in configuring enterprise-grade Cisco switches, conducting network reconnaissance and traffic analysis, and performing web application security assessments and digital forensics investigations using industry-standard tools. Demonstrated ability to design and build full-stack security applications spanning network scanning, web security analysis, and breach intelligence. Seeking to apply a strong technical foundation and hands-on security experience in an entry-level Cyber Security, SOC Analyst, or Penetration Testing role.

TECHNICAL SKILLS

Security Tools: Burp Suite, Wireshark, Nmap, Autopsy, FTK Imager, FortiGate Firewall

Networking: TCP/IP, DNS, DHCP, VLANs, Routing & Switching, HTTP/HTTPS, TLS/SSL, Cisco Switch Configuration, Cisco Packet Tracer

Programming & Web: Python, JavaScript, Flask, HTML, CSS, SQL, SQLite, REST API Integration

Security Domains: API Security, Web Application Security, Network Security, Vulnerability Analysis, Digital Forensics, Risk Assessment

Tools & Platforms: Git, GitHub, VS Code, Android Studio, Render (Cloud Deployment)

EXPERIENCE

IT Intern – Networking & Cybersecurity / Young's (Private) Limited

Jul 2026 – Sep 2026

- Configured real Cisco switches, including VLAN segmentation, IP addressing, and device management.
- Configured and managed FortiGate firewalls for enterprise network security.
- Performed network reconnaissance and traffic analysis using Nmap and Wireshark.
- Conducted web application security testing using Burp Suite Community Edition and PortSwigger Labs.
- Carried out digital forensics investigations using Autopsy and FTK Imager.

PROJECTS

CyberGuard – Security Monitoring & Analysis Platform — *Python, Tkinter, SQLite*

- Built a desktop cyber security tool with a real TCP port scanner, automated service detection, and a modular risk-assessment engine.
- Implemented a weighted security scoring system with defensive recommendations, scan history storage, and automated TXT/CSV/PDF reporting.

WebWatch – Web Security & Domain Intelligence Analyzer — *Python, Flask, SQLite*

- Developed a web application analyzing HTTPS/TLS configuration, SSL certificate validity, security headers, and DNS resolution for any domain.
- Built a look-alike domain detection feature that generates domain variations and checks live DNS records to flag potential phishing domains.

EmailHunter – Email Breach & Exposure Intelligence Tool — *Python, Flask, JavaScript, SQLite*

- Built a full-stack web tool that checks an email address against known public data breaches via a live breach-intelligence API.
- Designed a weighted risk-scoring algorithm with severity classification, persistent scan history, and cloud deployment for cross-network access.

CERTIFICATIONS

- Basics of Cyber Attacks & Threats — Cambridge International Qualifications (UniAthena), Level 7
- Python Essentials 1 — Cisco Networking Academy (Python Institute)
- Introduction to Cyber Security
- Introduction to CIP (Critical Infrastructure Protection)
- Basics of Cyber Law
- Generative AI

EDUCATION

Bachelor of Science in Computer Science (BSCS) / Indus University

Sep 2024 – Jun 2028

Intermediate (Computer Science) / NCR-CET College
